

Dunbier
for boat trailers

LOADER

PRO SERIES

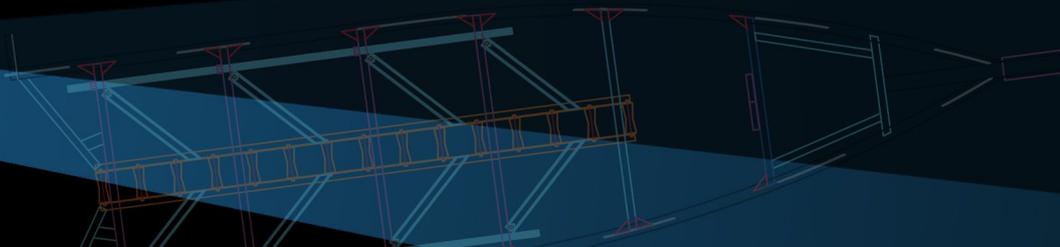

For 50 years we have been on the cutting edge of trailer design and the new Loader Pro Series is the next step in the evolution of Dunbier, Australia's Leading Trailer Manufacturer.

Tough, uncomplicated and reliable the new Loader Pro series is the ultimate workhorse. Unprecedented approach angles, ultra-glide roller rack and our all new "Backbone" alignment system make the Loader Pro the ultimate drive on trailer.

Why: *The Loader Pro has evolved to meet the changing needs of Australian Boat owners and delivers performance like no other. As boat and hull designs have changed so has the requirement for effective Launch and Retrieval features that suit all hull shapes whilst providing support in all the right places. Feature packed and Built to last.*

How: *Loader pro features our "Backbone" technology that guarantees you will always hit the trailer straight. With more than double the alignment skids and our new tapered feature retrieving your boat is effortless. The new Wide-Approach entry is the key for both novice and experienced boaters alike when retrieving in Challenging conditions.*

Understanding an Icon

The Loader Pro is the new bench mark in marine trailers.
Three key design features set us apart from the competition.

Back Bone System

The key to the Loader pro's effectiveness, is the Backbone system of heavy duty alignment pads, engineered to perform and never let you down. The Angle and placement of the pads has been perfected to ensure a seamless retrieval.

Ultra Glide Roller Bed

High quality rollers on solid steel pins are the key to reducing the rolling resistance in the Loader Pro. Protecting the keel line and carrying the load effortlessly the result is an unbelievably smooth launch and retrieve.

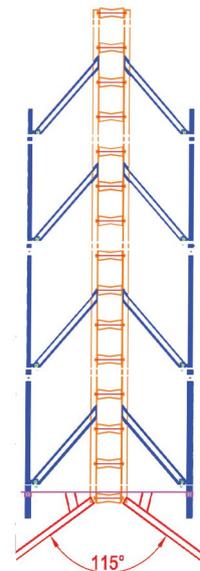

Angle of Attack

Our new entry system increases the approach angle to 115 degrees because in some situations bigger is better! The entry pad angle has been rigorously tested to lift the bow of your boat with no risk of catching or damage in various water depths.

Loader Pro Key Features

- Choose from heavy duty galvanized steel or ultra light welded alloy frames
- Standard with galvanized 7 spoke rims or upgrade to Alloys for a sleek look
- Ultra bright submersible LED Light systems as standard
- Heavy Duty winch post, winch & webbing for the toughest tasks
- Galvanized hubs, brake rotors and components for the ultimate in corrosion resistance
